Where, when and what?

SIW International Volunteer Projects organizes six projects in the Netherlands between July and September 2024 in the areas of nature preservation, organic agriculture, culture and social care. Each project takes place over two weeks in the summer by a group of volunteers of different nationalities. The volunteers work an average of six hours a day, five days a week. In their spare time and at weekends there is time for recreation and excursions. They spend time together to get to know the Netherlands better. Every project group consists of 10 to 20 participants.
